

POLYMERIS

Competitiveness cluster for rubbers, plastics and composites

LET'S INNOVATE TOGETHER
PRESENTATION OF THE CLUSTER

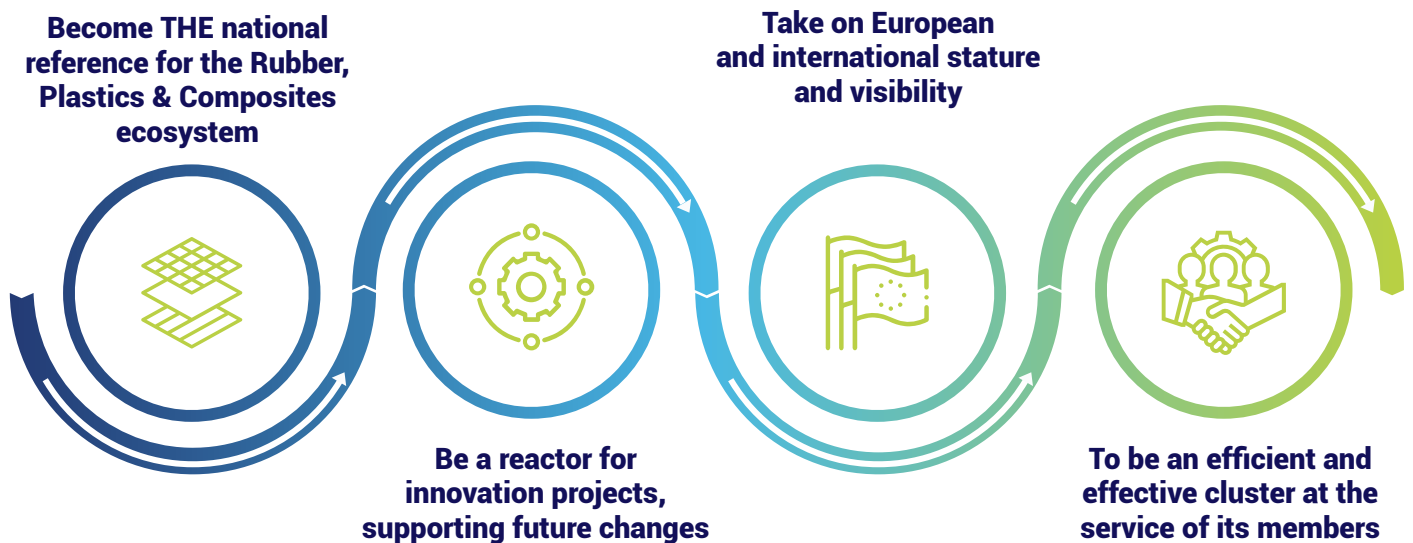

OUR MISSIONS

Support innovation by encouraging the development of particularly innovative collaborative research and development projects.

Supporting the development and growth of our member companies through the marketing of new products, services or processes resulting from research projects.

“ TWO MAIN AXES:
CIRCULAR ECONOMY
AND INDUSTRY OF THE FUTURE ”

OUR ROADMAP

KEY FIGURES

534

Members including

386

industrial companies

300

Labelled projects and funded since

10 years accounting for more than

700 M€

80

On-going projects including

60

in R&D and

15

in industrialization

35

European projects including

9

In progress

Key figures from 01/03/2022

OUR SERVICE OFFER

A range of services in 5 themes :

OPPORTUNITY ANALYSIS

Diagnosis
Analysis report
Recommandations

R&D PROJECTS SETTING-UP AND LABELLING

Partner search
Labelling by our Scientific Committee
Standard project management

R&D POST DIAGNOSTIC

Diagnosis
Analysis report
Recommandations

EVALUATION OF INDUSTRIAL PROJECTS

Assessment by our Industrial Committee
Hi France Label
Recommandations
Startups Program

NETWORKING

Participation in working groups
Promotion of skills (directory, newsletter, social networks, national and international events)
Qualified contact

A personalised support and 3 tailor-made paths

OPPORTUNITY

PERFORMANCE

GROWTH

AREAS OF TECHNOLOGICAL ACTION

A roadmap focused on the digital and green transition

	Materials	Processes	Products functionalized
Circular Economy	<ul style="list-style-type: none"> - Fillers and additives - Biobased materials - Vitrimers - High performance composites - Sustainable composites - Formulation / compounding 	<ul style="list-style-type: none"> - Chemical recycling - Mechanical recycling - Waste recovery - Eco efficiency of processes - Assembly and separation 	<ul style="list-style-type: none"> - Ecodesign and LCA - Aging and durability - Identification and traceability - Surface functioning
Industry of the future	<ul style="list-style-type: none"> - BDD materials - The behavioural prediction of materials 	<ul style="list-style-type: none"> - High added value processes - The digital factory - Monitoring and process monitoring - Additive manufacturing - Zero defect production 	<ul style="list-style-type: none"> - Functional and usage simulation - Structural electronics

OUR ECOSYSTEM

Polymeris' partners in the Plastics, Composites and Rubber industry

National Union

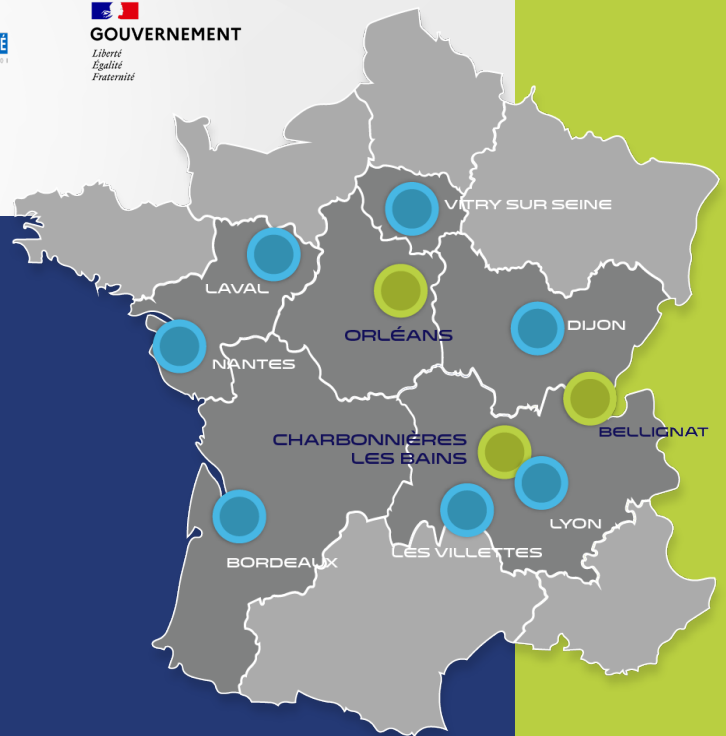

Technical Center

Training Center

European network

ACTIONS IMPLEMENTED WITH THE SUPPORT OF :
